Sent to Health Department this morning. I have a lot of correspondence with them, so I think we can show that we are making progress on the well.

Good Morning Guys,

The architect is submitting plans to the township for site plan review and asked for preliminary responses from local jurisdictions. Is there anything you can provide at this point? It sounds like we're making progress, but still have a few items that need to be addressed with EGLE. Do you have a idea of when the well review might be completed? The form and fees should be in your office by now. Let me know if you need any other information.

Thank you,

John Urbain, P.E., L.S.

Zoldan,

I have afternoon appointments so I can't attend a meeting on this short of notice. I typically am scheduled out about a week, so I would need more notice to make sure I can be available.

I guess John can discuss the outcome of the meeting with us later?.....

The point that needs to be discussed is the build out of condo's(number of units) to make sure the well does not become a Type I supply.. Aso there will be some discussion needed about a couple variances in the future to surface water and probably some fuel storage(if < 800'), for the existing well..

You may also want to discuss what type of water sampling EGLE would like to see from the existing well(proposed well to service the development).

Thanks

Clay McNitt

Hello Clay and Eric,

You should have just received an invitation to attend the water supply classification meeting this afternoon to discuss Bluebird. I apologize for the late notice.

If you are able to attend we would be happy to have you, however I understand if you are unable to do so due to the late notice.

Please let me know if you have any questions.

Thanks,
Ariel
