

**Notes**

- Drive loop expansion creates a second vehicular entry on Burdickville Road in location of existing entry to current driving range area.
- Multiple parking lot location options shown on plan for consideration. Additional on-site parking would alleviate the need for parking along Burdickville Road.
- Proposed restrooms would be modern facilities with running water and flush toilets. Septic tank and field locations would need to be identified based on existing soil characteristics.
- Creation of the proposed drive extension, multi-purpose field, parking lots, and paved trail loop would necessitate grading work.
- Proposed dog park incorporates double-gated entry.
