Dear Board of Commissioners,

Yes, my wife and I both voted for funding for this important program. Yes, we are retirees on limited pensions since we both worked in retail. We are the dumb people who the majority of the board are “protecting” from our free spending ways by eliminating a program we think important not just for our grandchildren and great grandchildren but for our future when all of the people of Leelanau county benefit from investing in the future. We voted to put our limited tax dollars where our mouth is.

If the Board is so concerned about the wrong choices made in the election let’s start by taking another look at who we voted to be “public servants” and what service means.
