Subject: RE: Proposed retro action for Early Childhood Development funding

September 20, 2021

To Whom It May Concern:

As a year-round resident of District One (Elmwood Township) I am writing to voice my opinion regarding the proposed veto of the mileage that passed for early childhood development funding in Leelanau county. I am shocked that the county commissioners are in a position to veto what the public voted for! There is countless data supporting early childhood development and the long-term positive effect of same. I do not want this public vote reversed by the county commissioners! They are supposed to be representing the public in their district and a public vote should be sufficient for them to support the approved mileage proposal.

I would like this letter to be of public record.

Thank you,

Kimberly Creamer
