Hello Clerk,

I would like to have my voice heard regarding today's meeting dealing with the voter approved milage funding early childhood programs.

I find it disheartening that our elected officials voted without discussion on turning down funding for early childhood programs in our county. As someone with a Master's degree in education and raising 3 young children, it is a no-brainer that getting kids and their caretakers the attention they need for a healthy and successful start in life is of the utmost importance. Why this was railroaded without any discussion and without any scaled back counter proposals against the voter's will, suggests that our elected Republican affiliated members are perhaps more concerned with making political statements rather than governing in moderation.
