---

Please include this as public comment for the Budget Hearing.

Since May the Leelanau County Commissioners; Robbins, Lautner, Bunek and Rushton have been hearing from the public about their needless spending in regards to the creation of new departments for finance and Human Resources. No factual information or even an attempt to rationalize a reason has been provided for support of this wasteful spending.

Why are you insisting that over \$200,000 be spent when the current organization is so successful? I know how long it takes me to save that much money and yet you are willing to just cavalierly add it to the expenses. This unnecessary spending is reprehensible.

What has happened to claims of Republicans of being fiscally conservative? What a waste of taxpayers dollars.

Remove the creation of two new departments from the budget.
