Subject: Public Comment Letter

Please share this letter with all members of the BOC and include it in the public record.

My name is Darlene Doorlag and I live in Centerville Township District 5.

I am writing in support of our Benzie Leelanau Health Department. I so appreciate all their extra hard work and long hours as they have and continue to keep us safe and disease free. The website they provide gives week by week data on new cases by age groups. Their graphics and data graphs are easy to read and understand. Their continuous provisions for Testing, Vaccines and Booster shots will consistently keep our case numbers low, and our hospitalizations and deaths even lower. I am thankful for their science based mandates as they continue to advise us on safe practices. Thank you Lisa Peacock and Michelle Kline who have endured so much completely unfounded criticism based on misguided people spreading misinformation. Please continue your good work. There are so many of us who really support and appreciate you. Thank you.
