**Subject:** Lake Level

Hi Steve and Jerry,

Just touching base on the lake level as measured at the Leland Dam. The ice has been off the lake for weeks and we can see the level came up a little then plateaued. We are trying to be patient but watched the recent rain (post ice and post April 15<sup>th</sup>) pour over the dam instead of being captured. As of today, the level is still 5" too low from the court ordered minimum of April 15<sup>th</sup>. Please follow the court order as quickly and consistently as possible.

Thank you,

*Dawn Lund*
