**GENERAL FINDINGS OF FACT**

The Commission finds that the site is located in Kasson Township, Leelanau County.

The Commission finds that the site is 80 acres M/L in size.

The Commission finds that the site is located in the Gravel Zoning District

The Commission finds that the proposed type of use of the property will be Gravel Mining and Extraction in nature.

The Commission finds that the proposed use as an earth removal, or quarrying, or gravel processing and mining operation is permitted in this District as a conditional use with a Special Use Permit.

The Commission finds that Section 7.3 of the Zoning Ordinance delegates the Commission the authority to review and approve, approve with conditions, or deny the request for a Special Use Permit.

The Commission finds that Section 7.5.B of the Zoning Ordinance requires a Special Use Permit Application contain a Development Site Plan prepared in accordance with Chapter 8 of the Zoning Ordinance.

The Commission finds that Section 8.4 of the Zoning Ordinance delegates the Commission the authority to review and approve, approve with conditions, or deny a Development Site Plan...

The Commission finds that a Notice of Public hearing was published on October 21<sup>st</sup> , in the *Leelanau Enterprise* as required by Sections 7.6.A.1 and 7.6.A.2 of the Zoning Ordinance and with Public Act 110 of 2006, as amended (MCL 125.3103).

The Commission finds that notice was mailed to all required parties on October 21<sup>st</sup> ,2021 , as required by Sections 7.6.A.1 and 7.6.A.3 of the Zoning Ordinance and with Public Act 110 of 2006, as amended (MCL 125.3103).

The Commission finds that an affidavit of notice as to the manner and date of service to all required parties was filed with the Commission at or before the meeting at which the special use permit is being considered as required by Sections 7.6.A.4 of the Zoning Ordinance.

The property covered by this Special Use Permit Application is described as:  
12488 S. Newman Road Maple City, MI.

ITEM	STD MET?	FINDING(S):
<b>SECTION 7.7 BASIS FOR DETERMINATION</b>		
<p><i>Before approval (or extensions) of a Special Use Permit, the Commission shall establish that the standards specified in this Section, as well as applicable standards outlined elsewhere in this Ordinance, shall be satisfied. Each of the proposed special land uses on the proposed location shall:</i></p>		
<p><i>A. Be designed, constructed, operated and maintained so as to be harmonious and appropriate in appearance with the existing or intended character of the general vicinity, as indicated in the Township Master Plan or other policies of the Township.</i></p>	<p>YES</p>	<p>This site is located in the Gravel Zoning District. Other similar processing operations exist in the District, this operation being no different in character. Gravel extraction is indicated for this area on the Master Plan of the Township. Therefore, it is found that this requirement is met.</p>
<p><i>B. Not be hazardous or disturbing to existing uses in the same general vicinity, and will not have adverse effects on the market value of surrounding property and to the community as a whole.</i></p>	<p>YES</p>	<p>In the past, it is believed that when any issues arose with surrounding owners, those were resolved quickly. Therefore, it is found that this requirement is met.</p>
<p><i>C. Be served adequately by essential facilities and services, such as, but not limited to, highways, streets, police, fire protection, drainage structures, refuse disposal, water and sewage facilities, and schools.</i></p>	<p>YES</p>	<p>Since the operation will continue as it has for a number of years, it is not expected to have additional impact on surrounding properties and residents. Therefore, it is found that this requirement is met.</p>
<p><i>D. Not create excessive additional requirements at public costs for public facilities and services.</i></p>	<p>YES</p>	<p>Since the operation will continue as it has for several years, it is not expected to have additional impact on public costs for public facilities and services. Therefore, it is found that this requirement is met.</p>
<p><i>E. Not involve uses, activities, processes, materials, and equipment or conditions of operation that will be detrimental to any persons, property or the general welfare by fumes, glare, noise or odors.</i></p>	<p>YES</p>	<p>Since the operation will continue as it has for several years, it is not expected to have additional impact on surrounding properties and residents for fumes, glare, noise or odors. Therefore, it is found that this requirement is met.</p>

<i>F. Will be in general compliance with the land use policies outlined in the Township Master Plan, the principles of sound planning, and will not jeopardize the economic welfare of the Township.</i>	YES	Based on past performance of the applicant who has another Special Use Permit, it is assumed and expected that the existing use will continue to be in compliance, follow the principles of sound planning and not jeopardize the economic welfare. Therefore, it is found that this requirement is met.
<i>G. Will not directly or indirectly have a substantial adverse effect upon the natural resources of the Township. Including, but not limited to, prime or unique agricultural lands, water recharge areas, lakes, rivers, streams, forest, wetlands, wildlife areas and major sand, gravel or mineral deposits.</i>	YES	Obviously the extraction of sand and gravel has an impact on the natural resources of the Township. However in the past, the operation has not been observed to have adverse impact on the other resources listed in this requirement. This land use has provided economic benefit to the Township and the region as a whole. Therefore, it is found that this requirement is met.
<i>H. Structures, landscaping, or other land uses, will not disrupt water drainage systems necessary for agricultural uses and will be in compliance with Leelanau County Drainage Commission requirements.</i>	YES	Since the nature of this mining operation is to create an area that is lower than the surrounding land, all drainage substances stay within the property. This pit does not collect groundwater that requires pumping and disposal offsite. Therefore, it is found that this requirement is met.
