Please share with the board of elected officials.

The health of our lake is of grave concern to me and I would like us to put in place a plan to preserve it as soon as possible — but to do so with a governing board that is accountable, representative of the constituents, has cost limits, has methods for voting and disbanding, accepts community input and is generally seen as fair to all parties. This is a hard undertaking, I recognize. I urge you to compromise and act quickly to meet the needs of our lake and residents at the same time.

Putting the whole cost on lakefront owners does not strike me as fair, and if that is to be the primary source of income it should be the primary source of representatives.

My sincerest hope for success and teamwork in this regard.
