To whom it may concern,

It has come to my attention that the board of commissioners is contesting mask enforcement (and health dept recommendations) in our school system.

As a critical care nurse at the local hospital, it is my responsibility to advocate for our communities health and well being (as well as my 2nd grade daughter at Leland Public). Masks have SAVED me from contacting COVID-19 and spreading it home to my loved ones. It is imperative that we take these recommendations from our health dept and apply them in our schools.

Thank you for your time,
Julie Kwieck, BSN RN
