Subject: Please forward to the BOC for tonight's meeting and file in Public comment

Commissioners,

In reading the headline article in today's Enterprise, I cannot believe that this meeting has been called to discuss the need for masks in school age children. Have you not been following the national news with the increasing number of children catching Covid? As you know vaccines are only available for those age 12 and older.

If we have even one fatality of a child in this county based on your undermining Health Department guidelines, you will be held responsible.

Sincerely,

Mary Tonneberger

Omena, MI 49674
