Subject: Masks and tonight's agenda
Date: Thursday, September 9, 2021 2:49:19 PM

Please include this in the meeting minutes of tonight 9-9-21.

The idea that this commission is going to try to undermine the CDC, health dept and science with COVID mask wearing is not right. If masks are mandated in certain areas including schools, airlines, businesses, government buildings/meeting then this needs to be abided by. To go outside what is recommended by health professionals then you are acting "above" their degree level, intellect and their job titles. Do not go in this direction. Support the healthcare recommendations and save lives!
