Subject: Fwd: Mask for students in school

Subject: Mask for students in school

Dear Commissioner Allgaier,

I'm writing, as a retired teacher, minister and grandmother of two young Leland students, in support of the Health Department's mask mandate for students, all school personnel, and individuals who enter the school buildings. The science behind this request is very clear and available to all who truly wish to know that masks prevent the spread of Covid 19. The Delta variant appears to be spreading among the unvaccinated more quickly, while allowing more breakthrough cases of vaccinated individuals, so it is imperative that the mask mandate be supported by the Leelenau BOC.

Please enter me letter as a voice requesting that our Leelenau BOC follow the science and vote to uphold the Health Department's school mask mandate into the minutes for tonight's meeting, September 9, 2021.

Sincerely,

Rev. Elizabeth A. Hill
