---

Dear Leelanau County Board of Commissioners,  
I am disheartened to learn that the Leelanau County Board of Commissioners is considering support for the Great Barrington resolution. It is my understanding that no member of the Board of Commissioners has medical training and is, or has ever been, a medical professional. Quite frankly, the Board does not have the standing or expertise to make a decision to support this resolution. Such decisions are best left to the health department and medical professionals. I ask that you focus on our county's business and leave medical judgements to those who have expertise.

Sincerely,  
Rick Cross  
Northport
